

Cirion Connect

Your Gateway to Latin America's Digital Economy

Powering low-latency connections to public clouds, carriers, and key partners across Latin America.

Overview

Cirion Connect is the interconnection layer of Cirion DC Platform – delivering fast, secure, and carrier-neutral connectivity across Latin America's most cloud-enabled hubs. Enables low-latency, scalable access to over 100+ carriers, 4900+ cross-connects, and 7+ cloud on-ramps to simplify your hybrid deployments and accelerate your go-to-market.

Key Benefits

- **Direct cloud access:** Private, high-performance links to AWS, Google Cloud, Oracle, and Microsoft.
- **Dense interconnection fabric:** Access a dense interconnection fabric with 100+ carriers and service providers, and 4900+ cross-connects available across Latin America.
- **Ultra-low latency:** Optimized for edge and core workloads that require speed and reliability.
- **Flexible deployment:** Deploy interconnection services as your needs evolve — from single cross-connects to multi-site integration.
- **Security and control:** Keep your traffic off the public internet with private links and advanced routing (coming Q4 2025).

Product Components

- Secure, low-latency cross-connects to networks, clouds, and partners.
- Direct on-ramps to leading public cloud providers.
- High-throughput Internet Exchange (IX) peering options in core markets.
- Scalable internet access and routing services.

Ideal for:

- Hyperscalers and telcos seeking neutral, scalable colocation.
- Enterprises modernizing infrastructure without CAPEX.
- Edge deployments that require geographic reach and uptime.

Available in seven countries and growing

25+ years of operational excellence

Backed by Stonepeak, a leading global infrastructure investor
