

Cirion Core

The Foundation for Your Digital Deployments

From power and space to security and remote hands, get everything you need to build, launch, and scale in Latin America – from the ground up.

Overview

Cirion Core is the physical foundation of Cirion DC Platform, delivering high-performance, carrier-neutral colocation infrastructure in strategically located data centers across Latin America. With redundant power, advanced cooling, and enterprise-grade security, Cirion Core gives you the control and reliability to deploy mission-critical workloads at scale.

Key Benefits

- **Carrier-neutral design:** Choose from 100+ network providers and connect freely across our interconnected facilities.
- **Redundant power and cooling:** Dual-feed power, UPS, and N+1 systems for high availability.
- **Enterprise-grade security:** Multi-layered physical and digital protection.
- **Proximity to partners and clouds:** Deploy infrastructure close to customers, cloud on-ramps, and service providers.
- **24/7 remote hands:** On-site teams are ready to provide operational support when you need it.
- **Energy-efficient operations:** Designed with sustainability in mind to reduce energy use and carbon footprint.
- **Proven compliance:** ISO-certified, PCI DSS compliant, and Tier III validated facilities for secure, high-performance operations.

Product Components

- Racks, cages, and custom footprint configurations.
- A+B power feeds and environmental controls.
- Full physical security infrastructure (biometrics, CCTV, access controls).
- Remote hands and smart hands support.

Ideal for:

- Cloud and SaaS providers seeking low-latency edge access.
- Enterprises building hybrid/multi-cloud strategies in LATAM.
- Telcos, ISPs, and NSPs expanding LATAM reach or peering capacity.
- AI/ML and HPC workloads requiring high-density power and low-latency interconnects.

100+ network carriers & service providers

Direct access to **4900+** cross-connects

7 cloud on-ramps across top LATAM markets

**Ready to deploy?
Let's build your roadmap**
