

Cirion Managed

Infrastructure as a Service, From Rack to Runtime

Focus on what moves your business, and leave the back end to the experts, with a fully managed stack service.

Overview

Cirion DC Platform is Cirion's full-service layer, delivering turnkey infrastructure solutions all managed by our expert team. From hardware and OS to monitoring and patching, we handle the complexity so you can innovate, scale, and serve your users faster.

Key Benefits

- **Fully managed infrastructure service:** We manage everything—from power to platform.
- **Faster time to market:** Avoid the delays of logistics, international customs, and hiring.
- **High-touch support:** 24/7 monitoring, incident resolution, and hands-on help.
- **Flexible scaling:** Start small and scale fast, without reinvesting in new tools or talent.
- **Security and compliance:** Infrastructure aligned with regional data policies and SLAs.

Product Components

- **Cirion Core:** Space, power, and remote ops.
- **Cirion Connect:** Cloud and network access.
- **Cirion Compute:** Dedicated and virtual environments.
- **Cirion Managed:** OS, hypervisor, monitoring, patching, backups, and remote support.

Ideal for:

- Enterprises without local infrastructure teams.
- Public sector or regulated industries.
- Global companies expanding into Latin America without overhead.
- Startups and SaaS providers needing hands-off infrastructure.

Expert operations team
across **7 countries**
