

Cirion DC Platform

A Smarter Way to Build Across Latin America

Cloud-connected, carrier-neutral, and ready for what's next – Cirion DC Platform gives you the infrastructure foundation to deploy, scale, and lead across Latin America's fastest-growing markets.

Overview

Cirion DC Platform is the ultimate infrastructure infrastructure powering Latin America's digital economy. From racks and power to compute, cloud access, and fully managed solutions, Cirion DC Platform meets you where you are – and grows with you.

Our modular architecture includes four key solutions:

Cirion Core: Foundational colocation and physical infrastructure.

Cirion Connect: Dense interconnection and cloud access.

Cirion Compute: Cloud-ready bare metal and private cloud environments.

Cirion Managed: Fully hosted and supported Infrastructure as a Service performance, proximity, and transformation.

Key Benefits

- **One platform, endless possibilities:** Deploy physical, virtual, and managed infrastructure, all in one place.
- **Wide reach, no overhead:** Expand across LATAM without shipping gear, hiring staff, or building local teams.
- **Built for scale and speed:** Scale anything from edge nodes to wholesale deployments at speed.
- **Carrier-neutral, cloud-connected:** Direct access to 100+ carriers and 7+ public cloud on-ramps.
- **AI-ready, hybrid-capable:** Built for GPU-intensive workloads and complex hybrid cloud deployments.

Product Components

- **Cirion Core:** Colocation, racks/cages, power, remote ops.
- **Cirion Connect:** Cross-connects, access to cloud onramps, peering, internet access and IP transit.
- **Cirion Compute:** Bare metal servers, private cloud environments, hybrid integration
- **Cirion Managed:** OS management, monitoring, security, SLAs.

Ideal for:

- Hyperscalers needing edge-ready deployments without logistics overhead.
- SaaS and cloud providers expanding to new LATAM markets.
- Enterprises looking to modernize and reduce total cost of ownership.
- AI/ML providers seeking GPU-optimized, low-latency infrastructure.
- Governments and regulated industries requiring compliant, local control.
- Channel partners delivering turnkey solutions to LATAM customers.

- **100+** carriers and service providers.
- **7+** cloud on-ramps across key LATAM hubs.
- **4900+** cross-connects in market-dense facilities.
- **10+** expansion projects underway in five countries.
- **25+** years of operational leadership.
- **Backed by Stonepeak**, a leading global infrastructure investor.

Make your dream LATAM network a reality
