Re: Tier III Certification of Constructed Facility for the CenturyLink Comunicações do Brasil Ltda. – São Paulo Datacenters DC-6, DC-7, DC-8, DC-9 and DC-10 in Cotia, São Paulo, Brasil

Dear Mauricio Merlino,

Uptime Institute Professional Services is pleased to announce the Tier Certification of Constructed Facility for the CenturyLink Comunicações do Brasil Ltda. – São Paulo Datacenters DC-6, DC-7, DC-8, DC-9 and DC-10 as fulfilling Tier III Concurrently Maintainable criteria. This Certification is based on the design, facility demonstrations, the on-site verification of the constructed facility completed on 31 October 2021, and documentation subsequently received through 2 March 2022.

This Certification recognizes the CenturyLink Comunicações do Brasil Ltda. – São Paulo Datacenters DC-6, DC-7, DC-8, DC-9 and DC-10 as supporting any planned work on the site infrastructure without disrupting computer room power and cooling capacity. This Tier III Certification is based on a total IT load of 795 kilowatts (kW) of alternating current (AC). This includes 210 kW in DC-6; 95 kW in DC-7; 93 kW in DC-8; 260 kW in DC-9; and 137 kW in DC-10.

Tier III Concurrently Maintainable criteria are founded on the capability to complete planned facility maintenance or modifications on a scheduled basis; equipment failures or distribution path faults may lead to unplanned outages. Certain operations-related errors (such as procedural errors during reconfiguration of redundant systems, components, or site infrastructure equipment) may still impact the critical load.

This Tier Certification is valid until the facility is modified, including any changes to the capacity components or distribution paths depicted in the design identified above, and submitted for review. This Certification is subject to the limitations set forth in Schedule I hereto and incorporated herein.

This Tier III Certification of Constructed Facility represents CenturyLink Comunicações do Brasil Ltda.'s continued investment and commitment to site uptime availability.

Congratulations on this significant achievement.

Sincerely,

Christopher Brown
Chief Technical Officer
