Re: Tier III Certification of Constructed Facility for the Cirion Technologies Ecuador S.A. – Quito Datacenter Carcelén, Phase 2 in Quito, Ecuador

Dear Felipe Gómez,

Uptime Institute Professional Services is pleased to announce the Tier Certification of Constructed Facility for the Cirion Technologies Ecuador S. A.– Quito Datacenter Carcelén, Phase 2 as fulfilling Tier III Concurrently Maintainable criteria. The Tier Certification is based on the design, facility demonstrations, and the on-site verification of the constructed facility that was completed on 23 September 2022 and documentation subsequently received through 26 October 2022.

This Certification recognizes the Cirion Technologies Ecuador S. A.– Quito Datacenter Carcelén, Phase 2 as supporting any planned work on the site infrastructure without disrupting computer room power and cooling capacity. This Tier III Certification is based on a total IT load of 344 kilowatts (kW). This includes 320 kW of alternating current (AC) load in the data center room and 24 kW of direct current (DC) load in the Nodo/Carrier Room; these loads are the cumulative total loads between an undefined Phase 1 buildout and a Phase 2 capacity expansion.

Tier III Concurrently Maintainable criteria are founded on the capability to complete planned facility maintenance or modifications on a scheduled basis; equipment failures or distribution path faults may lead to unplanned outages. Certain operations-related errors (such as procedural errors during reconfiguration of redundant systems, components, or site infrastructure equipment) may still impact the critical load.

This Tier Certification is valid until the facility is modified, including any changes to the capacity components or distribution paths depicted in the design identified above, and submitted for review. This Certification is subject to the limitations set forth in Schedule I hereto and incorporated herein.

This Tier III Certification of Constructed Facility represents Cirion Technologies Ecuador S. A.'s continued investment and commitment to site uptime availability.

Congratulations on this significant achievement.

Sincerely,

Christopher Brown  
Chief Technical Officer
