Benefits of SAN1

Security

By hosting your operations in Cirion Data Centers, you ensure a **secure environment** with strict access control, continuous monitoring, and **state-of-the-art infrastructure**. This means protection against physical and cyber threats, keeping your data safe at all times.

Connectivity

Cirion's Data Centers' **Carrier Neutral** policy allows customers to choose from various telecommunications providers to connect their infrastructures, ensuring resilience, **low latency**, and greater **network optimization**. This approach promotes redundancy, reduces failure risks, and improves service availability, providing a highly scalable and secure environment for critical applications.

Energy

Cirion's customers operate with safety and sustainability, thanks to a redundant energy infrastructure and advanced green practices. This ensures **uninterrupted operations** and a genuine commitment to environmental preservation.

Refrigeration

Cirion's advanced climate control systems ensure efficient cooling, reducing energy consumption and maximizing equipment lifespan. With precise temperature and humidity control, customers operate in a **sustainable, secure, and high-performance environment**.
