São Paulo Data Center

Benefits of SAO1

Security

The security of **Cirion Data Centers** provides customers with peace of mind to focus on growing their businesses, ensuring that their critical data and applications are protected in a **highly secure and resilient environment**. With advanced protection measures, risk mitigation, and specialized support, operations remain stable and reliable.

Connectivity

Cirion's Data Centers' **Carrier Neutral** policy allows customers to choose from various telecommunications providers to connect their infrastructures, **ensuring resilience, low latency, and greater network optimization**. This approach promotes redundancy, reduces failure risks, and improves service availability, providing a highly scalable and secure environment for critical applications.

Energy

Cirion ensures that its customers operate with maximum reliability, providing **uninterrupted** and **sustainable energy**. The SAO1 Data Center has its own **exclusive substation**, powered directly by two high-voltage lines with **100% renewable energy**.

Refrigeration

Maintaining equipment in a Data Center with controlled climate conditions ensures greater **security** and **reliability** for business operations. Optimal temperature and humidity levels guarantee better server **performance**, preventing unexpected downtimes and reducing maintenance and hardware replacement costs.
